

ANDRE LUBIN Keryann

Java project's review:

I had a very dynamic group with a good atmosphere, with well-defined tasks for each of us.

It was a difficult but pleasant project, to create our first game in JAVA.

We finally had a good result in the end, with a well-functioning game that correspond to the project's requirements.

This project allowed me to learn more into Java programming and it helped me to reinforce my knowledge and to learn new things.
