FOURNEL Maxime

<u>My personal review of the Java Project :</u>

The group I was in was very dynamic and participative. We made a good repartition of the tasks and everyone work on his and helped if he finished early.

This was a tough project, but the satisfaction of seeing of game working nicely and that is pleasant is really something.

My knowledge in Java code has greatly improved because even in the Learning Unit, I didn't totally understand or see the hidden problems within the code.

Overall, it was a nice project.
