Vincent.Onfray

Java Project review:

This project was interesting; however, it was very challenging.

Overall, the code itself was a balanced challenge, and the tools around it (Maven, Junit and SureFire) were the biggest sources of error and setbacks, until the very deadline.

The group dynamics were good and allowed us to reach good levels of functionality in the code.

Partners evaluation:

Maxime Fournel : A   Quite motivated and efficient

Keryann Andre-Lubin: A   Very motivated, he improved a lot during the project, and never refused to make efforts.

Loris Jemmi : A   Motivated and versatile, he contributed a lot to the completion of the project
